

A circular porthole view of a server hallway. The hallway is brightly lit with fluorescent lights on the ceiling. In the center of the hallway, there is a double door with a circular handle. The walls are light-colored, and the floor is dark. The porthole is set into a grey wall.

# Where connectivity meets cloud

Jens Möller, Director Carrier Relations Management

The changing world of IT

Cloud is everywhere – so ...

»do you still need your data center  
if everything goes into the cloud?«

»is cloud a disruption  
for data center operators?«

Disruption forces business transformation

Who wants to be a CIO?

Changing business models –

»Am I prepared to face new competitors?«

Limited capacity –

»Is my existing IT prepared to keep pace with a changing business?«

Fast change –

»Do I know the right partners and technologies that help me to achieve my goals?«

## Thrive within disruption

How about a secure home for your IT

- with capacity to grow
- a network to connect
- and room to innovate

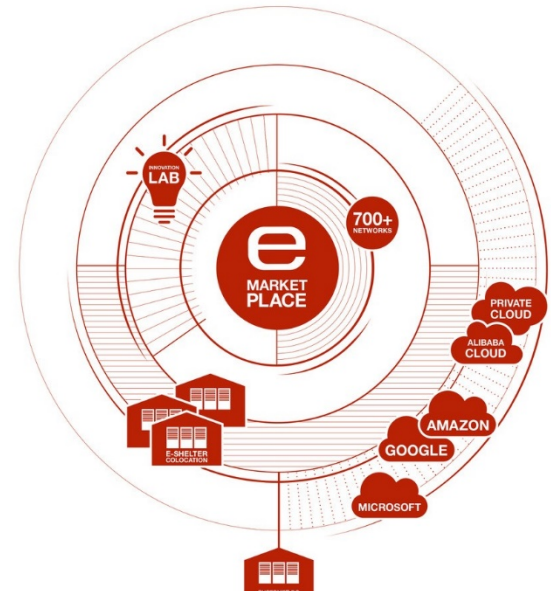

## Home to the cloud

From wholesale data center provision, to colocation, connectivity and direct access to a complete cloud ecosystem

Top-class product and service platform

- Highly available, scalable data center space with high power density
- Flexible colocation spaces
- Global cloud and carrier network access
- Own innovation lab

## Home to the cloud

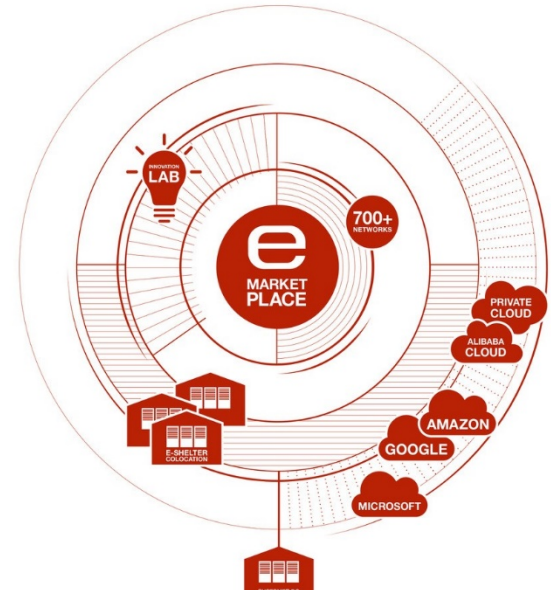

From wholesale data center provision, to colocation, connectivity and direct access to a complete cloud ecosystem

### Top-class product and service platform

- Highly available, scalable data center space with high power density
- Flexible colocation spaces
- Global cloud and carrier network access
- Own innovation lab

### Modern mega data centers

- 300 MW power capacity on ten sites
- Own planning and design team
